

About CineRegio

CineRegio is a network of regional film funds in Europe. The network represents 52 regional film funds from 12 EU Member States, Norway, Switzerland and UK.

The members deliver a range of schemes to the film sector which aim to support film culture, encourage social cohesion and build regional infrastructure.

Regional film support is vital to foster and safeguard the development of the European audiovisual sector and promotes local cultural identity, cultural diversity as well as democratic empowerment.

CineRegio's main objectives are threefold and interlinked:

Knowledge Sharing, Film Policy and Co-Productions

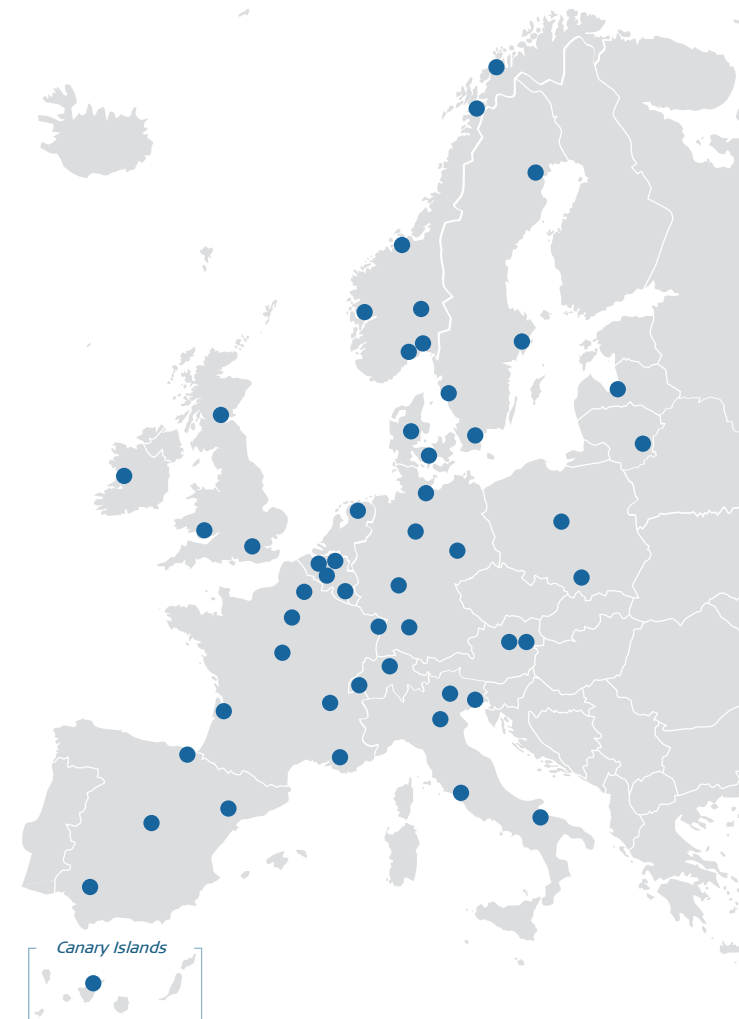

- To exchange views, perspectives, good practises and information for the benefit of the European film industry, including integrating new regional film funds
- To raise awareness, represent and promote regional audio visual interest across Europe, including member's interests towards European institutions and other organisations which play a role in determining the set of rules and conditions for regional film funds
- To strengthen the co-development and co-production of audio visual products, fusing talents and resources in different regions for a wider market – including stimulating artistic, technical and creative exchange and know-how throughout Europe

CineRegio encourages interregional co-operation, and together with the European film industry and members, we are continuously involved in initiating and organising activities in the European regions.

CineRegio a.i.s.b.l. was established in May 2005 as an independent non-profit association.
